

# Merative's Child Welfare Solution

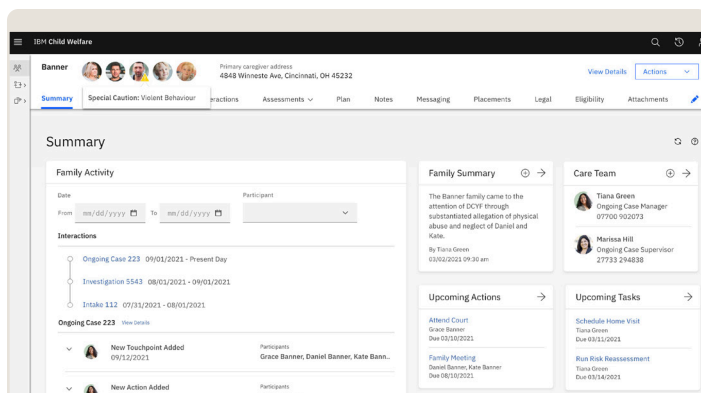

A transformational Child Welfare Software-as-a-Service (SaaS) Solution. Supports more effective and efficient engagements with families, children and community services.

## Family view for caseworkers

Centralized family dynamics and case information

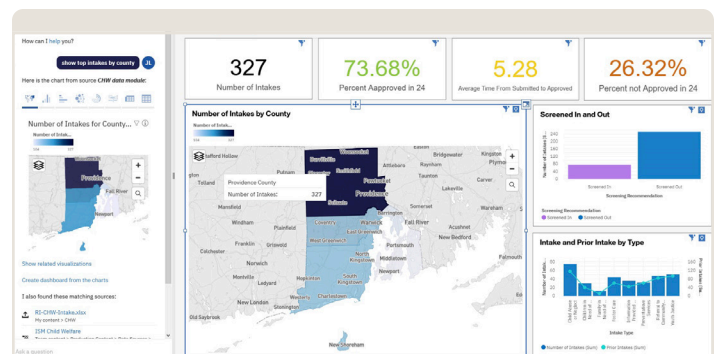

- **SEE** the big picture of family progression over time across interactions
- **IDENTIFY** which interventions have been successful and improved outcomes
- **REDUCE** risk of retraumatizing family and children by capturing data once, then surfacing summary and detailed data clearly
- **CONFIGURE** quickly, enabling your team to adapt as regulations and policies change

## Reporting and analytics for decision-makers

A collaborative way to inform and improve practices

- **ENHANCE** analytics with AI and natural language queries like “show me intakes by county”
- **SURFACE** data captured by caseworkers in a purpose-built human services data model
- **VIEW** mandatory Comprehensive Child Welfare Information Systems (CCWIS) reports and operational dashboards
- **COLLABORATE** on reports and set scheduled updates with key stakeholders

Our mission is to make a difference for children and families.

Child Welfare Solution available as an end-to-end solution or by module to quickly address changing needs.

- **Purpose-built modular social programs solution and data model** that supports CCWIS reporting
- **Family view** to improve caseworker interactions with children and collaboration with families
- **Faster implementation** with low-or-no code configurations
- **Lower cost** for ongoing maintenance and operations
- **Embedded** child welfare expertise
