

DATA SHEET

Innovative reading workflows for enterprise radiology

Merge PACS™

Your organization is likely operating in a fragmented environment, where physicians must read on multiple workstations and navigate convoluted workflows that diminish both their productivity and reading experience. As your organization strives to manage higher study volume, perhaps expand your geographic activities, and leverage every resource efficiently, having the right solutions in place has become imperative. Among these essential—and fundamental—tools, is a reading platform that allows you to better serve physicians while providing your IT department with the ability to scale.

How we help you.

Merge PACS is an AI-ready workflow platform that simplifies physicians' reading activities and empowers IT leaders with advanced control of the flow of studies throughout the enterprise. It aims to be the only reading platform physicians need to read multiple specialties, run preferred radiology applications, and gain access to AI-enabled solutions and insights into patients' data—all from a single worklist. At the same time, Merge PACS also provides organizations with innovative ways to manage studies throughout the entire enterprise to extend business coverage, increase efficiencies, and reduce costs.

Merge PACS arms providers with innovative workflows to efficiently manage the flow of studies in local, remote, disparate and teleradiology environments. With Merge PACS you can:

Access multiple applications from a single worklist

Leverage a highly modular and flexible worklist that allows physicians to automate the launch of specialty viewers and enables multiple workflows to coexist natively and simultaneously.

Control the flow of studies

Deliver the right study to the right reader at the right time with a comprehensive rule-based engine that helps balance workloads, maximize expertise, and ensure SLA turn-around-times are met.

Drive critical communications and compliance

Enable active consultation among departmental experts, such as ER and radiology, via embedded instant messaging and auditable worklist exchanges.

Measure and improve outcomes

Move beyond simply monitoring your systems. Gain a real understanding of how your organization performs with enterprise-wide reports on reading activities.

Related radiology solutions

Merge Clinical Review

A radiologist-trained AI tool that efficiently informs confident care decisions.

Merge Workflow Orchestrator

A cloud-native SaaS to orchestrate the radiology workflow.

IBM iConnect® Enterprise Archive (by Merative)

A vendor neutral archive (VNA) to create an enterprise imaging strategy.

IBM iConnect® Access (by Merative)

A zero-download, diagnostic quality image and XDS viewer for referring physicians.

Merge RIS™

An outpatient radiology information system designed to meet Meaningful Use.

Merge CADstream®

Improve MRI study analysis and reporting with automated and standardized processing.

About Merative

Merative is a data, analytics and technology partner for the health industry, including providers, payers, life sciences companies and governments. With trusted technology and human expertise, Merative works with clients to drive real progress. Merative helps clients orient information and insights around the people they serve to improve decision-making and performance. Merative, formerly IBM Watson Health, became a new standalone company as part of Francisco Partners in 2022. For more information on Merge PACS, visit merative.com.
