

MERATIVE MICROMEDEX WITH WATSON

Clinical knowledge
with the power
of AI

Put the power of AI to work for you. Discover Merative™ Micromedex® with Watson® — trained by clinicians and refined by you

- Accelerate access to evidence-based information
- Ask questions naturally, the way clinicians ask clinicians
- Deliver quick clinical responses, supporting fast patient care
- Online access options allow for direct access from within the EHR, or on-the-go via a mobile browser

Micromedex Updates and Enhancements

AI continues to evolve, with new mobile browser capabilities and multiple HER Integration options, providing quick answers at your fingertips.

IV Compatibility has been enhanced, creating a user-friendly, single view of Drug and Solution compatibility.

Streamline clinical workflows with the organization's Formulary embedded in Micromedex, including prominent display of information and icons, with single click access to detailed Formulary information.

Enhancements to NeoFax & Pediatrics, allowing efficient content searchability, quick navigation within monographs, and a modern enteral drug user interface.

Tap into the AI-powered search technology directly from Micromedex by activating the conversational search assistant "Ask Watson"

Micromedex Footprint

3,300+

Evolving for nearly 50 years and used by over 3,300 hospitals and health systems

400M

Content relied upon worldwide, with over 400 million document views within Micromedex annually

70+

Used in 70+ countries by healthcare organizations, governments, payers, academic institutions, poison control centers, and the life sciences industry

“The system gets us to the answers we need faster... We really see that advantage in people who are less experienced with legacy drug database searches and may not have that muscle memory that lets them toggle through the system with their eyes closed. It makes the learning curve much shorter.”

Dennis Killian
VP, Clinical Operations,
TidalHealth Peninsula Regional Medical Center

Integrating Micromedex into your EHR is a simple way to help your caregivers accelerate clinical response time and patient care with fast and more natural access to evidence.

Integrated Delivery embeds the Watson Assistant in any location within the EHR, allowing users to query information across many drugs in a single screen. This may help reduce calls to pharmacy, as caregivers will have access to quick answers to drug dosing, interactions, IV compatibility and more, without having to interrupt their workflows.

InfoButton provides context-specific links to Micromedex from within the EHR. This means that if a patient's record includes reference to a particular drug, an InfoButton link will take them to a Micromedex page with information about that drug.

We recommend that clients take advantage of both Integrated Delivery and InfoButton to maximize their Micromedex access and overall experience.

Watson Access from EHR Sidebar, with launch to Micromedex in a new window

Merative seeks to unlock this data and knowledge through the power of cognitive computing, a new approach to computing built on decades of research and development in artificial intelligence (AI).

About Merative

Merative is a data, analytics and technology partner for the health industry, including providers, payers, life sciences companies and governments. With trusted technology and human expertise, Merative works with clients to drive real progress. Merative helps clients reassemble information and insights around the people they serve to improve healthcare delivery, decision making and performance. Merative, formerly IBM Watson Health, became a new standalone company as part of Francisco Partners in 2022. Learn more at www.merative.com
