

Cúram's Child Welfare Solution

A transformational child welfare solution that supports effective and efficient engagements with families, children and community services.

Family view for caseworkers

Centralized family dynamics and case information

- **SEE** the big picture of family progression over time across interactions
- **IDENTIFY** which interventions have been successful and improved outcomes
- **REDUCE** risk of retraumatizing family and children by capturing data once, then surfacing summary and detailed data clearly
- **CONFIGURE** quickly, enabling your team to adapt as regulations and policies change

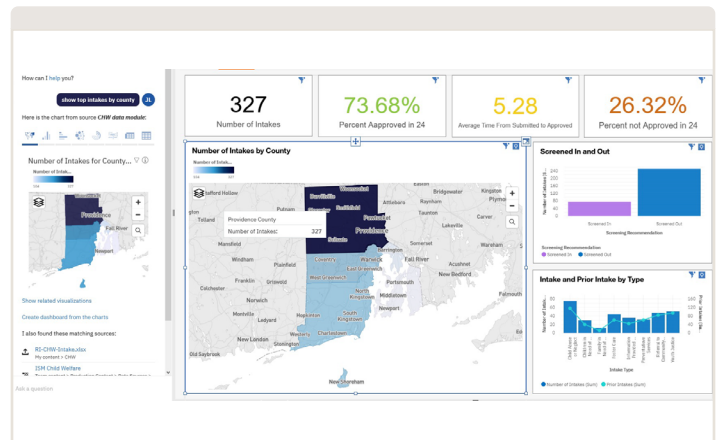

A consolidated view of all engagements with the family, tracking history and progression

Reporting and analytics for decision-makers

A collaborative way to inform and improve practices

- **ENHANCE** analytics with AI and natural language queries like “show me intakes by county”
- **SURFACE** data captured by caseworkers in a purpose-built human services data model
- **VIEW** mandatory Comprehensive Child Welfare Information Systems (CCWIS) reports and operational dashboards
- **COLLABORATE** on reports and set scheduled updates with key stakeholders

Our purpose-built data model allows for flexibility and choice of analytics tools

Our mission is to make a difference for children and families.

Cúram's™ child welfare solution is available as an end-to-end solution or by module to quickly address changing needs.

- **Purpose-built, modular social programs solution and data model** that supports CCWIS reporting
- **Family view** supports caseworker interactions with children and collaboration with families
- **Faster implementation** with low-code or no-code configurations
- **Lower cost** for ongoing maintenance and operations
- **Embedded** child welfare expertise
