

DATA SHEET

An easy-to-use, automated documentation tool for the cardiac cath lab

Merge Hemo

Your cath lab team works in a fastpaced, dynamic environment that must accommodate high procedural volumes. There's simply no time to waste using an inefficient or outdated hemodynamic system that requires the manual input and management of procedural data.

In order to succeed, you need a comprehensive hemodynamic solution that can help address the most pressing cardiac cath lab challenges. One that will help enhance clinical workflow, automate data collection, streamline inventory management and improve clinical reporting.

The Merative advantage

Merge Hemo™, Best in KLAS for Hemodynamic 2023, can be the hemodynamic solution your organization needs to help you meet today's cardiac cath lab challenges. It provides:

- Easy-to-use and intuitive user interface, with drag-and-drop utility, touch screen interface, full cath lab visualization and real-time procedural documentation
- Workflow and data management for inventory control, patient vitals, patient management and procedural documentation – which is further enhanced with seamless integration to Merge Cardio™ and leading EHR vendors
- Efficient clinical workflows that support multiple facilities on a single server, creating improved data collection, automated report pre-population and streamlined procedural documentation, which frees up your clinical team to spend more time with patients

With Merge Hemo you can:

Automatically pre-populate physician clinical reports with relevant hemodynamic data

Visualize your entire cath lab department (including pre- and post-holding) on a single screen via the Departmental Overview Board

Gain improved access to patient data with a single server that supports multiple facilities and departments

Automatically capture critical patient data, including EtCO2, Apnea, Pleth, SpO2, HR

Merge Cardiology Solution Suite

Merge Cardiology Solutions seamlessly integrate with the industry's largest health information systems and EHRs for interoperable image exchange, a key component of an overall strategy to provide secure and timely access to patient information regardless of location and affiliation.

Merge Cardio

Access and manage your patients' digital integrated cardiovascular record from a centralized, web-enabled system that lets you streamline report generation and distribution.

Merge Hemo

Document the hemodynamic workflow and data collection in your cath lab into a digital patient record using a simplified touch screen interface and automated reporting.

At Merative, we offer a powerful combination of resources, expertise, technology and vision to help your cardiology department thrive.

About Merative

Merative is a data, analytics and technology partner for the health industry, including providers, payers, life sciences companies and governments. With trusted technology and human expertise, Merative works with clients to drive real progress. Merative helps clients reassemble information and insights around the people they serve to improve healthcare delivery, decision making and performance. Merative, formerly IBM Watson Health, became a new standalone company as part of Francisco Partners in 2022. Learn more at www.merative.com
